If statement

Check if a Number is Odd or Even

Enter a number:

```
<form action="oddeven.php" method="post">
  <label for="number">Enter a number:</label>
  <input type="number" name="number">
  <button type="submit">Check</button>
</form>
```

If statement

```
$number = $_POST['number'];

if ($number % 2 == 0) {
    echo "<p>The number $number is Even.</p>";
} else {
    echo "<p>The number $number is Even.</p>";
}
```

```
<form action="oddeven.php" method="post">
    <label for="number">Enter a number:</label>
    <input type="number" name="number">
    <button type="submit">Check</button>
</form>
```

Create a simple web application using **HTML** and **PHP** to calculate the **Body Mass Index (BMI)** based on user input, and display the corresponding **BMI status**.

You must:

- Create an **HTML form** to ask the user to input:
 - **Weight** (in kilograms)
 - **Height** (in meters)
- Use **PHP** to:
 - Calculate the **BMI** using the formula:

$$\text{BMI} = \frac{\text{Weight (kg)}}{(\text{Height (m)})^2}$$

- Display the **calculated BMI value**.
- Display the **BMI Status** based on the following table:

BMI Value	Status
Less than 18.5	Underweight
18.5 – 24.9	Normal weight
25.0 – 29.9	Overweight
30.0 and above	Obese

Loop Statement

```
<h2>Enter a Number</h2>

<form action="accumulate.php" method="post">
  <label>Number:</label>
  <input type="number" name="number">
  <button type="submit">Submit</button>
</form>
```

Enter a Number

Number:

Submit

Loop Statement

```
<?php
$num = $_POST['number'];

$total = 0;

for ($i = 1; $i <= $num; $i++) {
    $total += $i;
}
```

1

2

3

4

5

The total from 1 to 5 is: 15

```
echo "The total from 1 to $num is: $total";
?>
```

```
<?php
```

```
$num = $_POST['number'];
```

```
$total = 0;
```

```
$table = "<table border='1'>";
```

```
for ($i = 1; $i <= $num; $i++) {  
    $table .= "<tr><td>$i</td></tr>";  
    $total += $i;  
}
```

```
$table .= "</table>";
```

```
echo $table;
```

```
echo "The total from 1 to $num is: $total";
```

```
?>
```

Loop Statement

Number
1
2
3
4
5

Dropdown Input

Select a Number

Choose a number: 1 ▾

1
2
3
4
5

```
<h2>Select a Number</h2>
```

```
<form action="dropdown_process.php" method="post">
```

```
<label>Choose a number:</label>
```

```
<select name="number">
```

```
<option value="1">1</option>
```

```
<option value="2">2</option>
```

```
<option value="3">3</option>
```

```
<option value="4">4</option>
```

```
<option value="5">5</option>
```

```
</select>
```

```
<button type="submit">Submit</button>
```

```
</form>
```

```
<?php
```

```
$num = $_POST['number'];
```

```
echo "You have selected: $num";
```

```
?>
```

Radio Button Input

Select Gender

☐ Male
☐ Female

```
<h2>Select Gender</h2>
```

```
<form action="gender_process.php" method="post">
```

```
  <input type="radio" name="gender" value="Male"> Male<br>
```

```
  <input type="radio" name="gender" value="Female"> Female<br>
```

```
  <button type="submit">Submit</button>
```

```
</form>
```

```
<?php  
$gender = $_POST['gender'];  
  
echo "You selected: $gender";  
?>
```

CheckBox Input

```
<h2>Select Your Hobbies</h2>
```

```
<form action="hobbies_process.php" method="post">
```

```
  <input type="checkbox" name="hobbies[]" value="Reading"> Reading<br>
```

```
  <input type="checkbox" name="hobbies[]" value="Traveling"> Traveling<br>
```

```
  <input type="checkbox" name="hobbies[]" value="Sports"> Sports<br>
```

```
  <input type="checkbox" name="hobbies[]" value="Music"> Music<br>
```

```
  <button type="submit">Submit</button>
```

```
</form>
```

Select Your Hobbies

- ☐ Reading
- ☐ Traveling
- ☐ Sports
- ☐ Music

Submit

```
$hobbies = $_POST['hobbies'];
```

```
echo "You selected these hobbies:<br>";
```

```
foreach ($hobbies as $hobby) {
```

```
    echo $hobby . "<br>";
```

```
}
```

Exercise

Create a simple web application using **HTML**, **PHP**, and **Bootstrap** to:

- Get the following user inputs:
 - **Name** (text input)
 - **Region** (radio button selection):
 - *East Malaysia*
 - *West Malaysia*
 - **Hobbies** (checkboxes):
 - *Reading*
 - *Traveling*
 - *Cooking*
 - *Sports*

After the form is submitted, use **PHP** to:

- Display all the entered information (Name, Region, and Hobbies) nicely.
- Format the output attractively using **Bootstrap** components such as:
 - Bootstrap **Card**, **Table**, or **List Group** (choose suitable ones).
 - Make sure the output is **centered** and **responsive**.
